

NOV 24 2008

requirements for patent applications containing nucleotide sequences, Applicants submit herewith a computer readable form of the "Sequence Listing". The Specification has been amended to replace the original Sequence Listing on pages 28-31 with an updated version. A substitute paper copy of the "Sequence Listing" is supplied herewith. The nucleotide sequence recited in the amended version is identical to the sequence as filed. The only change on the updated version is a recital of the proper inventorship (as previously corrected), and cross reference to the PCT application from which this case derives. Applicants also provide a statement that the content of the substitute "Sequence Listing" paper, and the computer readable copy are the same, and that they do not add any new matter to the captioned application.

TECH CENTER 1600/2900

Prompt and favorable action on the captioned application is courteously requested.

Respectfully submitted,

Charles W. Ashbrook
